

Listing of Claims:

1. (Original) A repetition lever for a grand piano, which performs the operation of pushing up a hammer after the hammer has struck a string,
 wherein the repetition lever is formed by a molded article of a thermoplastic resin containing long fibers for reinforcement, the molded article being molded by a long fiber process.
2. (Original) A repetition lever as claimed in claim 1, wherein the long fibers have a length not shorter than 0.5 mm.
3. (Original) A repetition lever as claimed in claim 1 or 2, wherein the long fibers are carbon fibers.
4. (Original) A repetition lever as claimed in any one of claims 1 to 3, wherein the thermoplastic resin is an ABS resin.
5. (Original) A repetition lever as claimed in any one of claims 1 to 4, wherein the repetition lever has a reduced cross-sectional area portion for reducing weight thereof.
